Abstract (en)

[origin: WO02060193A1] The invention relates to a method wherein a switching centre(12) in a circuit switching network (10) determines a bundle of lines (18) according to a predetermined method dependent on a signalling message. According to said method, at least one bundle of lines (18) is associated with a switching centre (14) and at least one bundle of lines (46) is associated with a network termination unit (44).
