Abstract (en)

The bulk container liner (10) comprises a woven reinforcement sheet (38) integrally secured upon a rear wall surface (22). Support ropes, straps, or cables (54) are also operatively connected to upper regions of the bulk container liner so as to facilitate the erection and support of the bulk container liner within a bulk material cargo container. The loading and unloading ports (24, 26) of the bulk container liner (10) are also fronded with reinforcement sleeves (86, 88). <IMAGE>
