Abstract (en)  
The waste bin cabinet (1) has at least one door (3) which can hinge around a vertical (31) and a horizontal (30) axis. The door in one storage area is rigidly connected to the housing (2) of the cabinet by connecting elements, and in two other storage areas is detachably connected to the housing by more connecting elements, whereby the door with simultaneous connection in the first and second storage areas is pivotable around a respective hinge axis. The storage areas are arranged in such a way that one hinge axis extends on the lower horizontal side of the door and one on a vertical side.
