Abstract (en)

The invention relates to a method for erecting a temporary flood wall construction (3) along a waterside comprising at least one gabion cage (4), whereby the gabion cage is securely fixed to the bottom, that at least the bottom panel and the rear panel of the gabion cage are provided with an impermeable lining (8) and that the front panel (10) of the gabion cage is provided with openings allowing the flood water entering the gabion cage when the flood water is rising and exiting the gabion cage when the flood water is subsiding. <IMAGE>
