Abstract (en)

[origin: EP1355016A2] The skylight for especially the roof of a residential dwelling has a cover (11) in the form of a cover plate (12) which is positioned and/or retained on a window casement (8) by means of at least one clip connection. The two vertical lower sections of the window casement may each have a cover with each positioned and/or retained on the window casement by a under-grip connection (16). The clip connection is located in one end section of the cover and the under-grip connection in the other end section (13).
