Abstract (en)

[origin: EP1355018A2] The sliding guide device (11) for a skylight has a base component fastened to a window frame (2) and which has a first slide surface of a slide channel (12) for a guide piece (13) fastened to a casement (3) and with a channel element retained on the base component by means of an adjusting device. The channel element has a second slide surface which with the first slide surface forms an adjustable clamp passage for the guide piece. The guide piece is elastically and preferably inherently elastically constructed with regard to the clamping action. An Independent claim is included for a skylight equipped with the sliding guide device.
