Abstract (en)
[origin: EP1355034A2] A curtain construction (1), comprises a length of cloth (2) supported by a supporting frame (3), which encompasses said length of cloth on the four sides thereof and includes latching and sliding means (4). <??>The rigid frame (3) comprises two or three section members snap coupled to one another, and the main feature thereof is that they can be easily used for making cut-two size elements arranged at 90 DEG . <??>These elements are adapted to firmly hold therein, along a suitably designed seat, the fabric material of the curtain, and to receive, along the outer side of the frame (3) and in another suitable seat, parallel but opposite to that therein the fabric (2) material is engaged, commercially available means for making the frame (3) rigid with other outer support elements both horizontal and vertical, or freely suspended, either fixed or slidable along rails (5). <IMAGE>
