Abstract (en)

[origin: EP1355332A2] The device has electrical contact points (11) on a movable, essentially plate-shaped bearer (10) and opposing fixed contacts that contact the contact points after a switching movement of the bearer. The contact points are mutually insulated so that they can have different potentials relative to each other and/or relative to the bearer. The bearer has conducting tracks in addition to the bearer. AN Independent claim is also included for the following: a keyboard with an inventive device.
