Abstract (en)

[origin: US2001022434A1] A roller skate includes an upper 1112, including a substantially non-rigid upper portion 1120 secured to a base 1118. A frame 1114 secured to the base carries a plurality of wheels 1116. The substantially non-rigid upper portion is reinforced by a substantially rigid internal heel counter 1134. An ankle support cuff assembly 1110 is pivotally secured to the internal heel counter 1134. The ankle support cuff assembly includes a substantially rigid ankle support cuff 1142 that is pivotally secured on lateral and medial sides to the internal heel counter. Ankle pad 1144 lines the interior of the ankle support cuff 1142. Ankle support cuff 1142 is fastened by a selectively securable fastener 1148 about the skater's ankle. The ankle support cuff assembly pivots freely in the forward and aft direction relative to the internal heel counter 1134.
