Abstract (en)  
[origin: WO02063105A1] The invention relates to method for producing a block of reinforced embankment (1), one lateral surface (3) of which comprises a facing made of stacked tyres (4) connected or not to an architectonic facing. Said block (1) is made of layers (c1 to c4) of embankment which are separated by flexible reinforcing plies (n1 to n4) and comprises at least one row (r1 to r4) of tyres on the surface (3) thereof. The plies (n1 to n4) are provided with a lateral strip (5) cut into widths (6) which are folded over the tyres (4) of the layer (c1 to c4) immediately above.
