Abstract (en)

[origin: WO02063110A1] The invention relates to a drainage device for fitting in and to a base surface, for the surface drainage of an area, comprising a run-off body, with a dished moulding (5) connected to the upper region, for housing a flange (2) with at least one fixing hole (6), which may be fixed by means of a screw or similar fixing device (8) to the dished moulding and with a gully frame (4) for fixing to the flange, which houses a cover (3), in particular, in the form of a grate, whereby the surface of the dished moulding is essentially larger than the surface of the flange.
