Abstract (en)

[origin: WO02061217A1] The use of a fastener (22) for joining two or more units of insulating material to each other. The fastener for use comprises a head (21) and a body (23) extending from its head. The body has an elongated shape comprising a first section and a second section, wherein this first section is connected to the head. The head may also be made of the same material as that of the first section and may be shaped in direct prolongation of the first section of the body and a method of joining two or more units of insulating material to each other.
