Abstract (en)

[origin: DE10102776A1] Device for returning the choke flap axle of a combustion engine choke to its start position. A tensioning spring (18) has two spring feet (181, 182) that are tensioned against cams (13, 14). One of the spring feet (181) has a has a spring element (19), with elastic strength that is less than that of the tensioning spring, that is supported on the contact surface (141) of the carrying or rotating cam.
