Abstract (en)

[origin: EP1357082A1] The present invention concerns an apparatus (1) for use in a bottling plant in order to prepare bottles previously filled and corked (capped) to labelling. The apparatus comprises at least a station (200) for heating the bottles (3), a station (100) for washing the bottles (3), a station (400) for drying the bottles (3) and a conveyor line (15, 17, 21) on which the bottles (3) are conveyed in alignment and in upright position through the stations of the apparatus (1). The apparatus (1) preferably also comprises a rinsing station (300) located between the heating station (200) and the drying station (400) in the advancing direction of the bottles. <IMAGE>
