Abstract (en)

[origin: EP1357217A2] The present invention refers to a textile finishing range that is at least composed of one moisturising unit, a compressive shrinking unit, a conveyor belt, and a compacting unit; the range is equipped with means that allow the passage of the fabric either into the compressive unit or directly into the compacting unit, or, successively, into both compressive and compacting units. <??>This invention also refers to a process for fabric finishing. <IMAGE>
