Abstract (en)

[origin: EP1184436A1] The present invention refers to the use of a pressure-sensitive adhesive tape comprising a backing bearing a pressure-sensitive adhesive layer, said backing comprising two or more layers, the exposed layer of the backing being a polymer layer wherein the polymer has a Vicat softening point of less than 65 DEG C, for increasing the stability of a stack of goods comprising two or more superimposed layers of goods. <IMAGE>
