Abstract (en)
[origin: DE10103933A1] The invention relates to a fuel injection valve for fuel injection systems of internal combustion engines, comprising a nozzle body (2) at whose downstream end at least one injection opening (7) is disposed and on which a sealing element is disposed that seals the valve from an adjoining component (32). At least one peripheral sealing collar (31) is provided on the nozzle body (2) as the sealing element and interacts with the adjoining component (32) to give a press fit.
