Abstract (en)
[origin: WO02059629A2] The invention relates to a device, a current measurer and a motor vehicle. The device is used to measure the intensity of an electric current flowing through a conductor (1), a sensing means (5) being provided therein. The sensing means (5) is embodied in a mechanically flexible manner. Said sensing means (5) is incurved against the surface of the conductor (1) corresponding thereto.
