Abstract (en)

[origin: EP1358966A2] The present invention relates to a circular vibratory finishing machine (1) with improved washing means, which comprises a circular tank body (2) for containing the parts to be treated (3) and the finishing media (4). The particularity of the invention consists in that it comprises, on the bottom of the tank body (2), a first inlet (10) for introducing a washing fluid and, at a preset level of said tank body, an overflow opening (11) for the washing fluid. <IMAGE>
