Abstract (en)

[origin: EP1358978A2] The stamping device has a stamping frame (2) with a longitudinally sliding stamping blade (4) for cutting a notch in the skirting rail (1) and a clamping device (3) for securing the skirting rail, having at least one movable clamp plate (6) and a cooperating clamp counter-bearing (7), provided by the stamping frame. The clamping device is adjustable for handling skirting rails of different thicknesses, e.g. by exchanging the movable clamp plate.
