Abstract (en)

[origin: EP1359113A2] The fork-lift truck includes a chassis (1), a lifting frame (5), a load fork (10) movable along the lifting frame, and at least one movement device to move the lifting frame related to the chassis. At least one of the acceleration and the speed of movement of the lifting frame that can be generated by the movement device are controlled as a function of at least one operating parameter of the truck.
