Abstract (en)  
[origin: US2004025455A1] A fire-resistant smoke-tight sliding door is provided which has at least one door leaf (1), which can be moved in a plane. The leaf (1) is made of fire-resistant glass and is accommodated in a frame (2). The door includes a conveying device, wherein the conveying device (3) has at least one track profile (4) mounted rigidly on a wall and at least one carrying element (5) connected to the frame (2). The carrying element (5) has at least one axle (6) with a conveying roller (7) mounted rotatably thereon with a said running surface (8) made of plastic. The conveying roller (7) has a core (9) made of a fire-resistant material.
