Abstract (en)
[origin: EP1359372A2] Burner for pellet fuel, connected to fuel feeding means, air feeding means and ignition means, comprising a main body (1), a combustion chamber (2) in which hot combustion gases flow essentially in a longitudinal flow direction (F) and a grate (3) adapted to support the fuel inside said chamber (2), in which said grate (3) is backwards inclined with respect of said flow direction (F), and air delivering means (16, 19) are associated to said grate (3), for blowing air on the pellet fuel placed on said grate (3) so as to provide partial gasification of said fuel. <IMAGE>
