Abstract (en)  
[origin: WO0230172A2] A delivery system for an anastomosis connector, comprising: a body including a handle for applying force; a capsule adapted to interlock with said body and for carrying a connector, wherein said force is transferred by said interlocking to deploy said connector; and an extension, adapted to be connected between said body and said capsule, thereby extending a reach of said delivery system.  
[origin: WO0230172A2] A delivery system (800) for an anastomosis connector (400), comprising: a body including a handle (862) for applying force; a capsule (850) adapted to interlock with said body and for carrying a connector, wherein said force is transferred by said interlocking to deploy said connector; and an extension, adapted to be connected between said body and said capsule, thereby extending a reach of said delivery system.
