Abstract (en)

[origin: DE10103826A1] The invention relates to a device for supplying the combustion chambers of an internal combustion engine with fuel. An injection valve (2) is disposed in a recess (34) in the receiving body (1) of an internal combustion engine, said valve being supplied with fuel via a fuel line (10). The injection valve (2) is positioned in the receiving body (1) by means of a retainer (9), said retainer (9) comprising zones (12, 18, 19) for receiving electrical contact elements (13, 14, 16).
