Abstract (en)  
A stay for a door or window which allows partial opening with maximum security has a slider moving along the stay and with a locking catch fitted to the stay and moving along a slot in the slider. The locking catch is spring loaded axially and/or the stay has elasticity in the axial direction of the catch. The latter is achieved by a profiled section of the stay to provide a set amount of elasticity.

Abstract (de)  
Die Erfindung betrifft einen Beschlag (10), z.B. für Fenster oder Türen, mit einer Stulpschiene (12) und einer entlang der Stulpschiene (12) längs verschieblich gelagerten Treibstange (14), wobei an der Treibstange (14) wenigstens ein mit der Treibstange (14) längs verschiebliches Verriegelungselement (26) befestigt ist, welches die Stulpschiene (12) durchgreift, wobei die Treibstange (14) in dem Bereich (44), in welchem das Verriegelungselement (26) befestigt ist, in Achsrichtung des Verriegelungselements (26) elastisch nachgiebig ausgebildet ist. <IMAGE>
