Abstract (en)
[origin: EP0932123A1] The arrangement comprises at least one input (311) and at least one output (361.1, 361.2), a stationary part (1), and interchangeable mobile modules (31-36) for performing respectively one complete function on the paper bill to be processed. The modules are mounted in such way in the stationary part, that a desired routine is provided for the processing of the bills between the input and the output. An Independent claim is respectively provided for a transport arrangement, a position sensor, and a bill entry unit to be used in the arrangement.
