Abstract (en)
[origin: DE10108312A1] The invention relates to a seat frame for fitting to the running gear (15) of a wheelchair or pushchair, comprising a backrest (1), a seating surface (2) and feet support (3). The aim of the invention is to produce a seat frame which is particularly flexible and may be adjusted to various sizes. Said aim is achieved, whereby long recesses, in particular grooves (5), are arranged running longitudinally along both sides of the seating surface (2), for housing fixing elements. Preferably, long recesses, in particular grooves (5), are also arranged running longitudinally along both sides of the backrest (1), for housing fixing elements.
