Abstract (en)

[origin: WO02066765A2] The invention relates to a connection device (10) for scaffolding (50), comprising a receiving device for detachably connecting at least one tube, in particular a railing tube (14) and a connection unit for detachably connecting the connection device (10) to a scaffolding tube (19) or a scaffolding frame (18). The invention is characterised in that the connection unit has a projecting part, which can be detachably connected by a positive and/or force fit into a recess (24) in the scaffolding tube (19) or scaffolding frame (18).
