Abstract (en)

[origin: EP1362539A2] A structural member (1) of a recessed supporting frame for bathroom fixtures is defined by a straight bar (2) having two weakened transverse portions (5) defining respective bend lines (6) along which the bar (2) can be bent by hand to form a U-shaped frame (13); each portion (5) has a succession of perforations (7) defined by respective slots (8) elongated longitudinally along the respective bend line (6).
