Abstract (en)  
[origin: EP1362540A1] A liquid detergent dispenser includes a replaceable cartridge (R) with squeezable structure and dispensing device (E), a support (S) provided with holes (H) for wall mounting as well as with a seat (U) suitable to receive the cartridge (R), and means (C, D, N) for locking the cartridge (R) in the seat (U) which can be disengaged only through a specific tool (K). In this way it is possible to combine the practicality of disposable dispensers with the irremovability of conventional wall dispensers. <IMAGE>
