Abstract (en)

[origin: EP1362547A2] Switching on an additional function alters a washing parameter for a selected washing program in respect of the use of a 3-in-1 multi-purpose preparation. As the additional function is switched on, a first method alters a selected washing program in a processing stage as it is running. A second washing program selected by a user for operating a dishwasher uses 3-in-1 multi-purpose preparations. An Independent claim is also included for a method for operating a dishwasher.
