Abstract (en)

The present invention relates (with reference to Figure 1) to illusion apparatus (10,20) for use in the performing of illusions for audiences, the apparatus comprises a receiver unit (10) having a power source (17), indicator means (13, 16), a signal receiver (14) and a control unit (15) which operates the indicator means (13,16) in response to signals received by the signal receiver (14). The apparatus also comprises a transmitter unit (20) comprising a power source (21), a signal emitter (22) and manually operable control means (23, 24, 25) for controlling operation of the signal emitter (22). The transmitter unit (20) can be used to remotely control operation of the indicator means (13, 16) of the receiver unit (10). Preferably the receiver unit is a wand. <IMAGE>
