Abstract (en)

Work roll for rolling a metal strip, comprising an essentially circular cylindrical working surface, whereby in area having a uniform curvature, the working surface is provided with a non-uniform surface finish. The work roll can be obtained by locally modifying the working surface to obtain the non-uniform surface finish. The work roll can be used in a final roll stand of an apparatus for rolling a metal strip. The metal strip product that is rolled with the work roll has a customised non-uniform surface finish, which can be a desired image such as a logo. <IMAGE> <IMAGE>
