Abstract (en)

[origin: EP1362698A2] The fixture has a projection (18) on the part (16) of the side edge reinforcement (12) which does not overlap the lift (10). The end point of the projection is on the side surface facing the top (14) of the cylinder lift. The soldering from this tip runs on the plane of the overlapping part either partly outside or directly on the side edge reinforcement.
