Abstract (en)
[origin: EP1362797A2] The bag (10) has a hose-form part (14) made of one piece of foil, the long edges (15, 16) of which are sealed one over the other to form a lap seal (inside to outside) or fin seal (inside to inside). A relatively rigid cover (17) has an opening cap (11). The top of the cover is welded to the edge of the bag so that it is sealed against the escape of liquid.
