Abstract (en)
The straw according to the present invention is a straw 3 adapted to be removably inserted into a press deformable container 1 through a straw insert opening 2 of the container 1, which is characterized by having a stopping part 4 for stopping itself from being inserted through the straw insert opening 2 and an inlet hole 5 at a position distant from the position of the stopping part 4 by a distance substantially equal to the thickness W of the container-forming material having the straw insert opening 2. <IMAGE>
