Abstract (en)  
[origin: US2004112787A1] The present invention relates to a method for packaging a product (10), in particular a cosmetic product, in a support (20) of flat overall shape through which a cavity (30) passes, which cavity opens onto a first face (21) of the support (20) via a first opening (31) and onto a second face (22) of the support (20), on the opposite side from the first, via a second opening (32), the said method consisting in: a) closing (100) the first opening (31) by means of a removable capsule (40), which is to be removed prior to first use of the product with a view to accessing the product; b) introducing (200) the product (10) into the cavity (30) via the second opening (32); c) closing (400) the second opening (32).
