Abstract (en)

[origin: WO02067872A1] The invention relates to preparations containing at least one type of wax having a melting point between 40 DEG C and 90 DEG C, at least one emulsifying agent, and at least one propellant. Said preparations can be sprayed in the form of an aerosol spray and are extremely suitable for treating keratin fibres, especially human hair. Furthermore, the addition of oil constituents selected from plant, mineral and synthetic oils gives the hair an especially beautiful sheen.
