Abstract (en)

[origin: WO02068207A1] The invention relates to a thermosensitive recording material, comprising a substrate (1), a thermosensitive recording layer (4) containing a colour former and colour acceptors, a protective layer (5) configured on the recording layer, whereby a coating (6) that covers the surface and is locally delimited is printed onto the protective layer. The invention also relates to the use of the inventive recording material as a ticket.
