Abstract (en)
[origin: WO02070552A2] The invention relates to polypeptides from a murine alpha / beta T-cell receptor, mediating a hdm2 protein-specific T-cell response, or functional variants or parts thereof, or nucleic acids coding for the above, functional variants, or parts thereof. The effect of the above is that hdm2 protein-expressing cells are recognised by t-cells provided with said genes, cytokines are expressed and a t-cell-induced lysis and/or apoptosis of tumour- or leukaemic-cells is induced.
