Abstract (en)

[origin: FR2821431A1] A reagent for ante-mortem screening of NTAC, obtainable according to a method wherein in a first step all or part of the 14-3-3 protein or the 14-3-3 anti-protein antibody is made to react with an aqueous aldehyde solution to obtain a final aldehyde dilution of 1 - 2 %; in a second step, all or part of the 14-3-3 proteins or the 14-3-3 anti-protein antibody contained in the product arising from the first step are fixed on a support in the presence of an aqueous aldehyde solution.
