Abstract (en)
[origin: US2004080122A1] The invention relates to an insulating glazed element comprising at least two glass sheets, separated from each other by a space and joined at their periphery by a seal, and at least one section. According to the invention, the glazed element has at least one heating border on at least one face of at least one glass sheet, and said border is covered by the section and joined to the section by means of a heat-conducting seal.
