Abstract (en)

A drawer shaped structure, with a quadrangular shaped base (7), made with two separate extruded shaped components (1) and (2), equipped with longitudinal weight reducing cavities and grooves, of which the former is appropriate for creating the pieces forming the side walls (3) and (4), and the latter, with the shape of its traverse section that recalls the letter "L", is appropriate for creating in one case two pieces forming the front and back walls (5) and (6) of the drawer and each of them at least one portion of its base (7), in the other case a piece that forms the back wall (6) and at least one part of the base (7) of the drawer. <IMAGE>
