Abstract (en)

[origin: WO02068656A1] The invention relates to a nucleic acid coding for at least one partial sequence of a protein kinase of the mitogenic signaling cascade, especially c-raf, wherein the partial sequence interacts with VDAC or BAX channels in mitochondrial membranes or with a nucleic acid hybridizing said nucleic acids or a homologue or derivatives of said nucleic acids, proteins or peptides coded for by such a nucleic acid. The invention also relates to a screening method.
