Abstract (en)

[origin: WO02077395A2] The invention relates to a foundation system for greenhouses, sheds and huts, consisting of lightweight foundation piles (1) and side panels (6), manufactured of polyester resin concrete. The foundation piles (1) are provided with two hook-shaped projections (2,3) and the side panels with ribs (7,8), which fit precisely into the hook-shaped projections (2,3). In this way, the side panels (6) can easily be hung onto the foundation piles (1), without a need for additional fastening means.
