Abstract (en)

[origin: EP1366689A1] The invention on the one hand relates to a shelf for a rack system, comprising a storage surface (3) and at least one corner forming assembly element (4) directed downwards, the assembly element (4) being an integral part of the shelf (1) and the assembly element (4) being formed by two lips (5 and 6, 10 and 11) bent over and overlapping each other at least partly, and the said lips (5 and 6, 10 and 11) being bent over, being provided to be inserted into a corresponding assembly element which has been provided in a support of the rack system. On the other hand, the invention relates to a method for manufacturing a shelf (1) for a rack system according to the invention, the sheet (2) being folded into a shelf (1) by means of rolling. <IMAGE>
