Abstract (en)

In a built-in domestic appliance with a door (D) provided with a vertically mobile decorative panel (P), the latter is applied to the door (D) through a mounting system including a releasable hinge (A, R) top coupling and a bottom connection with hinge means and actuator means (F) suitable to produce an outward movement of the panel (P) sufficient to take the bottom edge of the panel (P) outside with respect to an underlying plinth (Z) prior to the descent movement. <IMAGE>
