Abstract (en)
A yarn processing apparatus includes a first yarn feeder for feeding at least a yarn to a main frame. The apparatus includes a yarn processor for processing the yarn. The apparatus includes a second yarn feeder for feeding a processed yarn. The apparatus includes a winder for winding a fed yarn. The yarn processing apparatus is characterized in that each of the first yarn feeder, the yarn processor, the second yarn feeder, and the winder includes spindles; and operators for actuating the spindles independently of each other. The spindles and the operators are assembled as a unit.
