Abstract (en)
[origin: EP1367212A2] The fixed frame of the fire door (1) may be made from a steel plate bent into a hollow L-shape and is closed by a welded seam. The mitred corners of the frame may be welded. The door frame has a horizontal lintel (6) and sill (12) and vertical sides (8,10). The door leaf (4) is hinged to one of the vertical sides and there is an automatic door closer (20) attached to the top edge of the door. The closer has a rod (18) with its end sliding in a channel on the frame (16).
